DESCRIPTION
"How do you know where you will arrive? (The earth is full of dangers; you cannot make a mistake). I must say that there has always been the incessant sound of planes. We were so close to the ground that we could touch the leaves. The light was a series of flashes in the sky. Since then, it has been difficult to sleep...A detailed analysis was carried out : the earth, small beast, leaves, traces. Since a while, snow falls from the trees. As such, we know that time has definitively accelerated. My hands touched something. (We look at dust until we are blinded.) I enter the substance and I hear the sound of each grain which bursts. I leave once again in a current of hot air..."
