DESCRIPTION
A Scratch Y2K Hush-Song : Silences, Secrets & Games is an entirely visual commentary on the current state of the planet as it prepares for the over-mystified and over-mediated transition to a new millenium. A long lullaby for a crying newborn, this hybrid "scratch" collage sets off from the tender and peaceful universe of nursery songs on a vast panoramic tour of ever more secret, hidden and hushed dimensions of contemporary humanity, to form a mediated musical lament for future generations.
