Documentary

SERIE

Vivre motocycliste

**DESCRIPTION**

Nowhere in North America is motorcycling more popular than in Quebec. However, each year the motorcycle accident rate is consistently higher than that of automobiles. This sobering reality has prompted the production of *Vivre motocycliste*, a complete video documentary on safe driving practices. This educational tool encourages preventative attitudes and demonstrates several useful techniques for safer riding. *Vivre motocycliste* is for any current or future motorcycle enthusiast, especially those between the ages of 18-25.

Episode #4 : *La circulation : un risque calculable*. How to navigate in traffic : being visible, how to look, making room to manoeuvre, blind spots, intersections, how to position yourself on the road and the strange phenomenon of the solitary crash.
