2010

ORIGINAL LANGUAGE
No dialogue

CATEGORY
Video Art

DESCRIPTION
Frogfields is an exploration of video voltage-controlled by audio processed via a Sandine synthesizer produced in the context of a residency Liberovskaya and Margolis did in the spring of 2010 at the historical Experimental Television Center in Owego, (that closed its doors in July 2011 after operating for 40 years). The frog footage was shot at the Bronx zoo in 2009.
